### U.S. FLOATING ELEVATORS 59

### PRODUCT AND SERVICES 60

To use the buyer's guide, locate the product or service category of interest in the Product and Services section, then refer to the Manufacturers, Distributors and Services section for information about the suppliers listed.

### MANUFACTURERS, DISTRIBUTORS AND SERVICE COMPANIES 79

Names, addresses, phone numbers and contact person for companies which manufacture or distribute equipment or provide services for grain and grain processing are listed.

### PRODUCT PROFILE 94

Highlights of specific products manufactured by or services provided by advertisers in the guide are featured in this section.

### SUPPLIER FAX NUMBERS 97

Fax numbers are provided for those companies that included them with their listings.

This publication is a comprehensive directory of the companies involved in the U.S. grain industry and of the firms which supply products and services to the industry. The information and statistics contained in the 1989 *Grain Guide North American Grain Yearbook* were compiled from the best available sources. If there are additions, corrections or changes for any listing in the directory, attach a copy of the listing and mail it to Editor, *Grain Guide*, Sosland Publishing Co., P.O. Box 29155, Shawnee Mission, Kansas 66201. Single-copy cost of the *Grain Guide* for non-subscribers to *Milling & Baking News* is \$35.

## WORLD GRAIN

## Milling & Baking News

Grain Guide 5

## THE GRAIN 100

- The Grain 100 consists of the top multiple facility grain companies and cooperatives in North America according to total corporate grain storage capacity. (Ninety nine multiple facility companies with more than 6.5 million bushels storage are listed in this section.)
- Statistics for individual facilities are listed by state in the Port, River, Terminal and Subterminal section.
- Because country elevator numbers are included, the total number of facilities and the total corporate grain storage capacity figures may not necessarily be the sum of individual facility listings in the Port, River, Terminal and Subterminal section.
- Conversions of tonnes to bushels are approximates.
- Throughout the directory, leased facilities are listed under the company which currently operates the elevator with lessors designated in parentheses.
- Facilities owned by a consortium of more than two are not credited to any individual member.
- City or company names in parentheses following an individual facility location are for clarification purposes when referring to the Port, River, Terminal and Subterminal section. If the company has more than one facility in a city, the number follows in parentheses.

### Truck Unloaders...

Designed and Built  
to Serve the  
Grain Industry.

Millions of trucks have been unloaded by Straight Truck Unloaders at grain handling facilities and processing plants throughout the World during the past twenty-six years. Owners and operators praise the speed and dependability of the unloader and truckers are happy because the platform raises and lowers smoothly...there is no jarring of their equipment. These unloader benefits are possible because of our exclusive single cylinder designed with a roller track and cushioning arrangement.

When we introduced our single cylinder truck unloader it was a new concept. Today, with successful installations worldwide, we think this concept best serves the truck unloading requirements of the grain industry.

Ask us for details.

STUCK.**

**CBOT Agricultural  
Options on Futures.  
Made to manage your risk.**

With CBOT Ag Options, you can pin down a price with safety. So you can protect your price. Without restricting your potential profits.

Buying options on futures gives you a choice. Exercise them if the price is good; let them expire if it isn't. Your only risk is the known cost of the premium—a small price to pay for protection.

Lock in your price. But leave yourself open to opportunity. With options on corn, wheat, soybeans, and soybean oil and meal futures. At the Chicago Board of Trade, the world's oldest, largest and most liquid futures exchange.

**For more information, call  
1-800-THE-CBOT, EXT. 310 today.**

# PERFORMANCE

*The crucial factor in the grain business*

As a grain buyer, you have a lot to consider in deciding where to go in meeting your needs. Factors such as availability, price, quality, and delivery where and when you want it.

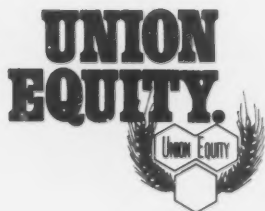

At Union Equity, meeting those needs is what our business is all about. We call it performance! And we think performance is what sets Union Equity apart.

Our customers obviously think so, too. They've helped make us a leader in marketing Hard Red Winter wheat and grain sorghum.

That performance also has been a key factor in some important changes at Union Equity. We've grown---expanding our area of grain origination and adding new facilities, all of which means even more assurance to you that Union Equity can meet your needs.

For wheat. And for grain sorghum. In the United States. And around the world.

*Union Equity. Some things are changing. Our commitment to performance stays the same.*

Union Equity Cooperative Exchange    2300 N. 10th, Box 3408    Enid, Oklahoma 73702-3408

Total licensed grain storage capacity: 6,687,000 bus.

Terminals: (9) Los Angeles, Calif.; Kansas City, Wichita, Kas.; Billings, Great Falls, Mont.; Cleveland, Ohio; Portland (Terminal Flour Mills), Ore.; Ogden, Salt Lake City, Utah.

## 99. ALBERTA TERMINALS LTD.

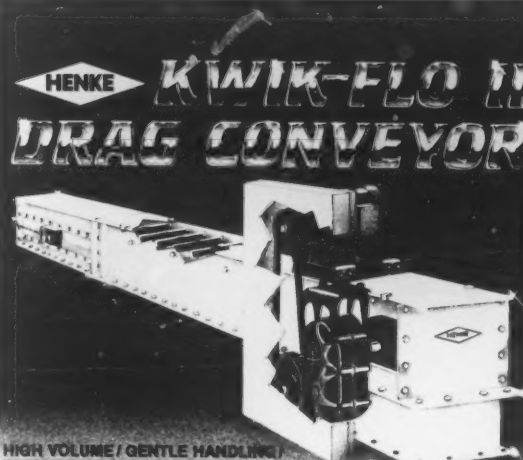

12705 St. Albert Trail, Edmonton, Alberta T5L 4H5  
Phone (403) 451-3920.

President: Earl H. Scharf

Total number of grain storage facilities: 3

Total licensed grain storage capacity: 6,500,000 bus.

Terminals: (3) Calgary, Edmonton, Lethbridge, Alberta.

### HENKE KWIK-FLO II DRAG CONVEYOR

**HIGH VOLUME / GENTLE HANDLING /  
LOW HORSEPOWER EN-MASSE CONVEYING  
OF WHOLE GRAINS AND OTHER  
FREE FLOWING GRANULAR MATERIALS**

**FEATURES**

- Heavy Galvanized Bolted Construction
- Five sizes with capacities through 25,000 BPH
- Easily removed head and tail shaft assemblies
- Pintle chain with carry back cup flight attachments and UHMW paddles

**Henke Machine, Inc.**  
P.O. Box 1006  
Columbus, NE 68601 USA  
1-800-226-1406  
Nebraska residents call  
(402) 564-0565  
FAX (402) 564-3153

**HENKE KWB SCALP**  
This high-capacity drag type  
scalp-chamber is designed for  
material screening. Changing  
screens is fast and easy.  
Adjustable speed.

**HENKE 3-HR ROLLER MILL**  
Roll corn - or other small  
grain - with one machine. Top  
rolls for corn, bottom rolls for small  
grain.

**HENKE ROLLER BINS**  
Provide economical storage of dry bulk products  
in a wide variety of sizes and capacities. Versatile  
designs to fit existing and new facilities.

— For Over 50 Years —

**BUILT BETTER THAN THEY HAVE TO BE**

**HENKE**

## PROFILE OF THE GRAIN 100

The 1989 North American Grain Yearbook lists the top multiple facility grain companies and cooperatives in North America according to total corporate grain storage capacity. To qualify, companies must have more than one facility and more than 6.5 million bus of storage. Companies are listed alphabetically when capacity figures are the same.

The licensed storage capacity of the Grain 100 totals 3,463,633,501 bus, up 215,510,501 bus over last year. Canadian companies and cooperatives accounted for 440,991,786 bus of the listed capacity. Of the U.S. listings, 61 are independent companies and 29 are cooperatives.

Nineteen companies reported an increase in corporate storage capacity from last year's figures.

The top North American grain companies operated 3,934 grain storage facilities not including unreported country elevators of several major companies.

A breakdown of the reported facilities in the Grain 100 shows 59 U.S. ports, 184 rivers, 265 terminals, 176 subterminals and 1,261 U.S. country elevators, 30 Canadian ports, three Canadian terminals, 1,948 Canadian country elevators and eight storage facilities at processing plants. Statistics for the Grain 100's individual facility locations are included in the Port, River, Terminal and Subterminal section.

In the Port, River, Terminal and Subterminal elevator section, the total of 896 individual facility listings is a 1% decrease in the number of listings in the previous directory. There are 66 ports, 239 river, 230 subterminals and 312 terminals, 38 Canadian ports, eight Canadian terminals and three floating facilities listed.

Additions to the Grain 100 included Rickel, Inc., Kansas City, Mo., Wright Lorenz Grain Co., Inc., Salina, Kas., and Stegner Grain & Seed Co., Grangeville, Idaho.

The following companies are no longer included in the Grain 100:

**Coffield Warehouses:** Sold its Orr and Houston, Texas, terminals to Louis Dreyfus Corp.

**Early and Daniel Industries:** Sold a terminal in Indianapolis (Acme Evans) to ADM Milling Co. and sold facilities in Louisville, Ky. and Beech Grove, Ind. to Merchants Grain and Transportation. At press time a port facility in Philadelphia, Pa. was for sale.

**Lincoln Grain, Inc.:** Facilities in Atchison and Colby, Kas. and Lincoln, Litchfield and South Sioux City, Neb. were sold to Elders Grain, Inc.

**Maple Leaf Mills Ltd.:** Sold all of its country elevators along with facilities in Midland, Port McNicoll and Sarnia, Ontario, and West St. John, New Brunswick to Cargill Ltd.

Other changes noted include:

**Harvest States Cooperatives** sold its Terminal No. 1 to the city of St. Paul, Minn. which will demolish the facility. Harvest States Cooperatives continues to operate Terminal No. 2 in St. Paul.

**International Multifoods** sold its flour mills at St. Paul, Minn., North Kansas City, Mo., Buffalo, N.Y. and Columbus, Ohio to ConAgra.

**Bunge Corp.** sold a port in Galveston, terminals in Fort Worth and Lubbock, Texas; Kansas City, Kas., along with country elevators in Oklahoma and Texas to Elders Grain, Inc.

**Continental Grain Co.** sold a port facility in Norfolk, Va., to Cargill, Inc.

**Producers Rice Mill, Inc.** bought the Stuttgart and Wynne, Ark., and Memphis, Tenn. facilities of Stuttgart Etcetera, Inc.

## U.S. PORT, RIVER, TERMINAL AND SUBTERMINAL ELEVATORS

### Definitions and Abbreviations:

- P:** A port elevator receives grain by truck, rail or barge for loading on ocean-going vessels.  
**R:** A river elevator receives grain by rail or truck to be loaded out by barge.  
**S:** A subterminal receives grain by truck or rail and ships out in efficient quantities by rail (unit trains).  
**F:** Floating vessel-to-vessel transfer facilities.  
**Cap:** Storage capacity in bushels, **up:** upright; **fl:** flat.  
**Li:** Type of license; **Fed:** federal; **St:** state.  
**RR:** Railroad service.  
**Rec:** Receiving by (mode of transportation).  
**Ld:** Loading by (mode of transportation).  
**Ld Cap:** Loadout capacity in bushels per hour.  
**Svc:** Services offered.

# IT'S 11:00 P.M. DO YOU KNOW WHERE YOUR SHIPMENTS ARE?

**For the first time, the answer is yes.  
With ACBL's exclusive new RIVER-TRAC™ computer  
tracking system.**

Like anything else, when it comes to shipping, time is money. And knowledge is power.

Those are the two basic ideas behind River-Trac, American Commercial Barge Line Company's exclusive computer tracking system for barges in transit on the inland waterways. With River-Trac, you receive instant information as to the location of your shipments in the ACBL fleet.

Updated several times daily, River-Trac provides the following

information on the screen of your IBM® or IBM-compatible PC with modem:

- Barge's river location by mile marker
  - What commodity is being shipped
  - Estimated time of arrival
  - When loaded
  - Its destination
  - Time of last report
- Knowing when your shipments will arrive allows you to make the most efficient use of manpower

and facilities. And lets you give your customers the information they need down the line.

River-Trac system software is provided free of charge to all ACBL customers. This exclusive system is the only one that offers instant updates several times daily, with current information available - around the clock. And it's available only to ACBL customers.

To put ACBL's innovation to work for you, call Ray Greenwell at (812) 288-0100.

# CLEAN AND SIMPLE

Reduce post-harvest grain losses

**Dockage Tester**  
Provides accurate and uniform tests of grain samples for dockage.

**Screener**  
For scalping, aspirating and sifting of grain for market, pellets, rolled grain, raw grain for feed, wheat for flour and other needs. Capacities of 1000 bph and up.

**Vertical Drop Multi-Clean Aspirator**  
For removal of light material using combined vertical and multiple cross-sweep aspirations.

**Scalperator**  
First removes roughage and field trash, then removes chaff, dust and other small materials from 1000-10,000 bph.

**Delta Combi Cleaner**  
Adjustable screen inclination enables it to be used both as a high capacity pre-cleaner for receiving or a fine cleaner for precision cleaning.

With the Carter simple, efficient grain conditioning systems, you'll have better grain and seed to store. And that means better prices at market.

You already know that Carter means accurate, uniform and reliable performance. Chances are you're using the Carter Dockage Tester, the official testing machine used in grain inspection offices of the U.S. Department of Agriculture and the Canadian Grain Commission.

Why not enjoy the same quality performance throughout your grain handling and storage operations?

Carter Day design and manufacture a family of machines that clean and size paddy or white rice, wheat, barley, canola, soybeans, corn—any type of seed or grain.

They're efficient because these heavy-duty machines supply you with the capacity to handle post-harvest seed and grain shipments without draining your power supply.

They're simple because they're easy to install and operate. With totally enclosed designs, you'll have a cleaner operation, and with fewer moving parts, Carter machines require little maintenance.

Let Carter Day handling and storage systems provide the return on investment you need—clean, sized seed and grain that will sell at premium prices.

For more information, call or write Carter Day.

AS OF JUNE 1, 1989 CMC-DAY LTD.  
IS CARTER DAY IN CANADA AS WELL!

## ANTEBY ENTERPRISES INC.

### PROFESSIONAL SILO CLEANOUT 10 YEARS AND GOING STRONG

- \* The Anteby system is capable of relieving the most difficult clogging problems, as well as normal cleaning and maintenance.
- \* The Anteby system will clean all types of scales from walls.
- \* Best performance, competitive rates, uncompromised safety, total material recovery, no human entry.
- \* Special non sparking equipment can be used in explosive environments.
- \* Minimal operational cost.
- \* Two options are offered: 1) Service 2) Complete Package to End User including Total Equipment and Sufficient Staff Training.
- \* With our System you get much more and you pay much less. Let us Prove it You!

The system is currently used by contractors such as:

Mole Master  
Sireco International  
Ifincorp Corp.  
FAC and Son Inc.

## STOP INSECT DAMAGE IN STORED GRAIN

### With Gastoxin®, the World Class Fumigant

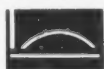

When you find insects stealing your grain profits, stop them with economical Gastoxin fumigant. Gastoxin is used on grain and stored products throughout the U.S. and 45 other countries around the world. It's a world class fumigant. Gastoxin with 57% Aluminum Phosphide active ingredient stops insect damage. Gastoxin kills all stages of insects, even the eggs. With Gastoxin you get the highest quality fumigant at the right price. Available in 1660-peil flasks and 500 and 100-tablet flasks.

#### RESTRICTED USE PESTICIDE DUE TO ACUTE INHALATION TOXICITY OF HIGHLY TOXIC PHOSPHINE GAS

For retail sale to and use only by Certified Applicators for those uses covered by the applicators certification or persons trained in accordance with the attached product manual working under the direct supervision and in the physical presence of the Certified Applicator. Physical presence means that the Certified Applicator must be available on site or on the premises. Read and follow the label and Bernardo Chemicals Ltd. product manual which contains complete instructions for the safe use of this pesticide.

Gastoxin is a registered trademark of Casa Bernardo LTDA.

# The Solution.

## ARCOprime® DS Oil Can Reduce Your Dust Control Problems.

### Dust Control.

Atlantic Richfield Company has taken a major step toward solving one of the industry's most persistent problems.

Our food-grade white mineral oil, ARCOprime DS Oil

- ✓ Reduces airborne dust
- ✓ Reduces risks of explosion
- ✓ Reduces unpleasant working conditions
- ✓ Reduces housekeeping costs
- ✓ Reduces disposal problems

**Plus**, ARCOprime DS Oil maintains its stability and purity without affecting the quality of the grain.

**Plus**, ARCOprime DS Oil gives you real cost ef-

ficiency. The ongoing application costs of this oil could very well beat those of any comparable product and any conventional dust control methods you may now be using.

**Plus**, our patented Duotreat® severe hydrogenation process gives you a low-temperature oil which can be applied in most any cold weather condition you'll come up against.

**Plus** . . . well, for all the other pluses, call Lyondell Petrochemical, the Atlantic Richfield division which makes ARCOprime DS Oil available. Discover for yourself how we can give you superior dust control and cost efficiency. For more information and a cost workup, call us.

Then watch the air clear.

Call 1-800-447-4572 (then press 14 on your phone)

## PUT THE BITE ON ABRASION

WITH **DIAMONDBACK** URETHANE LINER  
IT'S RATTLESNAKE TOUGH!

**DIAMONDBACK'S BEEN FIGHTING  
ABRASION IN BULK HANDLING  
INDUSTRIES SINCE 1977**

**DIAMONDBACK** is rattlesnake tough to fight the severe effects of abrasion in bulk material handling applications. The in-service life of spouts, chutes, distributors, transitions, elbows, bins, hoppers and other conveying components can be significantly increased by lining with **DIAMONDBACK**.

For applications involving extreme cutting abrasion (i.e. soybean processing) **DIAMONDBACK** is also available with a surface layer of CERAMIC CHIPS. The hardness and cut resistance of urethane make up a uniquely tough and wear-resistant product.

In addition to outstanding abrasion resistance, **DIAMONDBACK** is also lightweight, easy to fabricate and install, and meets FDA criteria for bulk food handling.

### AVAILABLE SIZES

**DIAMONDBACK** is available in standard sizes, as well as custom, scrap-saving sizes. Standard sizes are, by backing:

Expanded metal & solid metal back —  
4' x 10'

Fabric back and nonreinforced — 3'  
and 4' wide x 8' - 50' long

Ceramic chip — 4' x 10'

Custom sizes up to 5' x 12' sheet,  
and 4' unlimited length

Thicknesses of 1/8" - 3"

**DIAMONDBACK—THE ABRASION FIGHTER!**

**bailey-parks urethane**

**manufacturers of quality urethane products**

**Turbo Fan  
Heart of every AirLeg**

**Available in PTO and Self-Powered Models**

**Now with a 2 yr. limited warranty!**

# TURBO POWER!

## Built to keep on working even in "grit 'n grime"

When you buy a NEUERO AIRLEG Pneumatic Grain Conveyor, you're investing in a grain handling system that will last! Unlike other pneumatic units that use positive displacement to create air flow, NEUERO uses state-of-the-art cast aluminum Turbo Fans to create a mass of moving air that cushions and gently protects your

# NEUERO AIRLEG

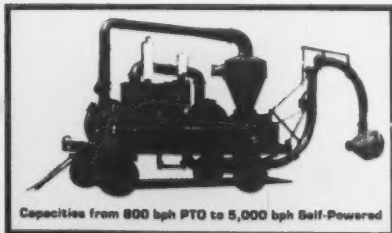

grain. A NEUERO AIRLEG can handle high moisture and FM-laden grain, and still keep on working day and night . . . at maximum capacity with virtually no downtime or maintenance. Plus, you'll have the safest, cleanest system and save thousands of dollars, too!

At NEUERO, we're so confident of our superior product design and

dependability, we've boosted our limited warranty to **two** years! It's really simple . . . we're designing and building pneumatic conveyors to **last!** Get **all** the details on a NEUERO AIRLEG today and Go Turbo Power!

## RESEARCH PRODUCTS COMPANY *Can* WIN THE BATTLE AGAINST INSECTS

### Detia® Gas EX-B

The proven, time tested sachet (bag) produces about 11 grams phosphine gas. Ideal for the fumigation of railcars, containers, warehouses, processing plants and other sealable enclosures. Easy to apply — easy to dispose of.

### Detia® Tablets

Each 3 gram tablet produces about 1 gram of phosphine from aluminum phosphide. Widely used for the fumigation of flat stored grain. Available 16 flasks per case. 500 tablets per flask.

### Detia® Pellets

Each .6 gram pellet produces about .2 grams of phosphine from aluminum phosphide. The preferred fumigant for fumigating silos as they are filled or turned. Available 20 flasks per case. 1660 pellets per flask.

## RESTRICTED USE PESTICIDE

**DUE TO ACUTE INHALATION TOXICITY OF HIGHLY TOXIC HYDROGEN PHOSPHIDE (PHOSPHINE, PH<sub>3</sub>) GAS**

For retail sale to and use only by certified applicators for those uses covered by the applicator's certification or persons trained in accordance with the product manual working under the direct supervision and in the physical presence of the certified applicator. Physical presence means on site or on the premises. Read and follow the label and the Research Products Company product manual which contains complete instructions for the safe use of this pesticide.

## LET US HELP PROTECT YOUR INVESTMENT

We offer an unsurpassed variety of fumigants, insecticides and other control products. Our experience in application is unequalled.

## **TRADITION.**

At Bartlett & Company, Grain, tradition means more than continuing on an already established course. It means achieving growth and improvement while adhering to the same demanding standards.

Since 1907, Bartlett has evolved into a diversified agribusiness company without compromising the high standards of its basic businesses. Country elevators in Colorado, Kansas, Missouri and Oklahoma serve grain growers in rural farm communities. And terminal elevators located along the Missouri River in Kansas, Missouri, Nebraska and Iowa receive grain from a broad geographic area.

And while Bartlett & Company continues to expand, you are assured the same continuing quality and excellence that comes with a proud tradition.

# DEPENDABLE Bulk Handling Equipment

**RELI-A-SENSE™**  
PATENTED  
**Bin Level Sensor**

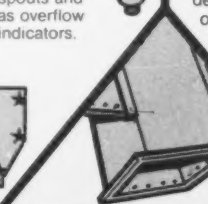

A safe, very reliable, solid-state, low voltage unit. Cannot ignite dust. Blend from multiple bins without surprise endings. Very easy to install at all levels, in spouts and as overflow indicators.

**PROBE-A-VAC™**  
for Fast, Easy Sampling and Fumigation

Obtain samples at any depth without moving tons of material. Test temperature at varying depths with thermistor on tip. Install temperature cables when bin is full.

\* Reg. TM of Cargill, Inc.

**ORIGINAL RHINO HYDE®**

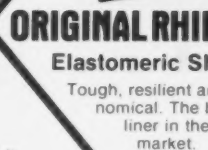

**EVERWEAR® BUCKETS**

The buckets that won't kick the bucket. Proven to outlast steel, nylon and plastic. Easily handles grain, pellets, soybean hulls, and fertilizers. Non-static, non-stick.

**CERATHANE® Ceramic-Backed ELBOWS**

No worry about losing individual ceramic tiles. Outer cavity filled with Cerathane resists wear and increases elbow life.

**Elastomeric Sheeting**

Tough, resilient and economical. The best liner in the market.

Contact any one of our sales team for information on Rhino Hyde® products and the name of your nearest distributor.

# *The Dreyfus Commitment:* **DISTRIBUTION**

Louis Dreyfus Corporation does more than buy and sell grain—we distribute it. Via railroads, rivers and oceans, we transport the products of America's croplands to points of distribution throughout the world. It's an enterprise which requires commitment. For the tools of our trade constitute a tremendous financial investment. Elevators, ships, railcars and barges are needed to move more than half a billion bushels of American grain around the world. It's no small task but it's part of our business—part of the Dreyfus commitment.

**Aeration and  
drying equipment.  
The most complete  
line in the industry.  
Plus FREE engineering.**

Caldwell gives you the biggest line of aeration and drying equipment in the grain industry. Equipment for any size operation. State-of-the-art centrifugal fans, axial fans, heaters, conditioning equipment, ductwork, floor systems. Plus:

- New Systa-Miser energy efficient fans — with up to 12% lower operating costs.
- Revolutionary Caldwell in-line centrifugal fans.
- New two-horsepower roof exhausters — with the highest performance rating in the industry.
- Turn-key short-term storage systems.

The full line is backed by Caldwell's full two-year product warranty. And when you specify Caldwell equipment, FREE engineering services are always part of the package.

**Call us toll free. Let's talk drying and aeration.**

P R O V E N  
PERFORMANCE

*The winning break-away. That singular moment in cycling when a rider anticipates victory and breaks away from the pack – the proven performance of a professional.*

*Those same qualities have helped the Commodity Marketing Division of Cargill become the world leader in marketing and distributing vital commodities. Our performance is well proven.*

*Anticipation and action are a key part of Cargill's success. We apply powerful technology to gather and analyze data on crop quality, available inventories and world market conditions. We employ skilled and experienced professionals, who anticipate markets, recognize opportunity and act with confidence. As a result, our customers – both buyer and seller – benefit.*

*The efficient distribution of surplus commodities to areas of deficit demands an organization with the knowledge and experience to anticipate, and the confidence and commitment to act.*

*Anticipation and action – the proven performance of Cargill.*

# A Bag Closing Program Custom Fitted to Your Needs.

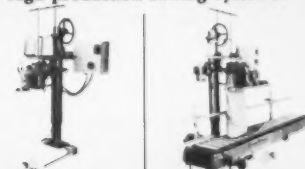

## Our Program Offers...

- The most complete selection of efficient bag closing equipment
- Standard and Automatic Sewing Heads
- Automatic High Production Bag Feed-In Devices
- Column and Conveyor systems
- Portable—Hand-held—Lightweight Bag Closers
- Application assistance availability
- Operation Manuals—highly detailed and illustrated
- Research and Development commitment
- Sales and Service facilities throughout the world

Our factory trained experts will assist you in selecting the right equipment for your bag closing operation. And their experience is backed by a total support program that keeps your operation running smoothly. Look to Union Special when you need the proper fit. **100 Lbs.** we have been manufacturing and supplying bag closing equipment for over 100 years. For additional information on our Bag Closing Program, call 312/669-3270 or write:

Union Special Corporation  
One Union Special Plaza  
Huntley, Illinois 60142 U.S.A.  
Telex: 257451 FAX: 312 699 3209

## High production sewing systems.

Compatible with all OEM bagging systems.

**Union Special**  
Proud Quality Industrial Sewing Equipment

## SUPERIOR DUST CONTROL WITH AN AG PRODUCT

Whole Grains • Ground Feed

### High Quality Food Grade Vegetable Oil Emulsion

- Cost Efficient  
General Applications:  
1-1½ gal/1,000 bu. of whole grain  
¼ gal/ton of ground feed
- FDA-Approved
- Worry-Free Multiple Applications with  
Superior Coverage
- Formulated for Long-Term Stability

Why worry about over-application of mineral oil - Use Dust Vac!

## CARGO INSPECTORS

# CYCLOTEC: The Art of Cyclone for NIR Analysis

NIR analysis of cereals, grains, and feed requires precise sample preparation. The new, improved Tecator Cyclotec® Mill assures the quality of your analysis with:

- extremely uniform particle size distribution
- rapid sample throughput
- self-cleaning features
- reduced noise level
- dust-free operation

No other cyclone mill offers this much.

We will be happy to grind your samples in our laboratory at no obligation to you. Please call or write for product details.

Sales and service exclusively by  
Fisher Scientific Company.

# Grain Handling Problems?

CONTACT YOUR DEALER TODAY!

With the current surge in temporary storage there will be an increase in storage problems such as, hot spots, spills, transfers and removal. The answer to all these problems is a Conveyor Grain Vac equipped with a P.D. pump, heavy duty frame, external filter and swivel truck loading kit as standard equipment. These units can be driven by P.T.O., self contained diesel engine or electric power. Seven models provide capacity from 2100 bu/hr to 3700 bu/hr. Take advantage of this quality product to help your customers solve their grain handling problems. Provide yourself with the unique opportunity to increase profits through sales and rentals during and after the peak storage and bin erection season.

## PROTECT YOUR INVESTMENT IMPROVE GRAIN QUALITY REDUCE INSECT DAMAGE

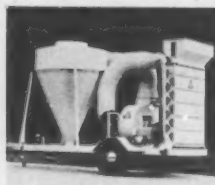

### Benefits of cleaning grain:

- Remove infestation & damaged kernels
- Improve grain quality
- Reduce shipping costs
- Reduce dockage discounts
- Recover a marketable product — dockage
- Improve drier efficiency
- Improve housekeeping
- Reduce dust hazards
- Improve aeration

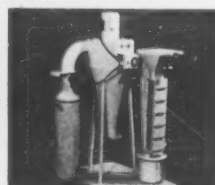

Kice has quality aspirators to fit every grain operation.

**1 MULTI-ASPIRATOR:** Heavy-duty, fixed-unit aspirator is designed for large volumes. Operates efficiently in even the busiest elevators. Separates dust, dockage/F.M. and damaged kernels from grain. No screens or moving parts. Changes commodities easily.

**2 PORTABLE ASPIRATOR:** Mounted on a road-worthy trailer, the unit can be set up over the grain dump pit or used for custom-cleaning on location. Use during winter months or off season, when work loads permit. Handles capacities up to 4,000 B.P.H.

**3 MULTI-ASPIRATOR DOCKAGE TESTER:** Fast, accurate and simple. Determines levels of dockage/F.M. and damaged kernels. Now elevators can test all incoming grain as part of the moisture and test weight operation. Reliable and repeatable results.

a leader in  
innovative  
bulk loading  
system  
design

DCL's advanced bulk loading systems are at work throughout the world, solving some of industry's most difficult problems — eliminating dust hazards and increasing loading speeds.

Our exclusive Rhino Hyde® urethane inner stacking cones plus innovative design features make our spout the best alternative.

Our success with repeat customers is the result of DCL designed systems that carefully consider every aspect of loading terminal operation.

For more detailed information, call or write Reinhard Matye, DCL, P.O. Box 125, Charlevoix, Michigan 49720, (616) 547-5600.

**DCL**

— ANNOUNCING —

We have expanded our quality line of products to include a complete size range of slide gates. Also ask us about aeration conveyor components and systems.

## Getting it together

**takes an engineering consulting firm with a lot of experience.**

At DER — "Getting It Together" — is more than solving today's grain-handling problems — it's careful planning for the future. A diversity of projects from country to terminal elevators has given us a vast amount of knowledge in the grain-handling field. Our geographic location in the agriprocessing belt gives us the unique opportunity of working with many grain-handling companies. Not only do we offer professional engineering services, but also you'll find our expertise in dovetailing the efforts of a contractor and suppliers can make your project both cost-effective and smooth-running.

WE INVITE YOU TO WRITE FOR OUR INFORMATION PORTFOLIO.

**Dennis E. Roby & Associates, Inc.**  
CONSULTING ENGINEERS

1900 E. Eldorado St., P.O. Box 1425, Decatur, IL 62525 • 217/429-4412

## Complete Grain Temperature Monitoring Service

### New Installations & Renovations

- Portable, console and computerized instrument.
- State-of-the-art relay switching.
- Three-year warranty on instruments and switches.
- Bulk and fabricated to order cable sales.
- High-quality Berkley thermocable and leadwire used exclusively.
- Fully equipped and experienced service crews.
- Complete systems from farm storage to major terminals.
- Systems for temporary storage facilities.
- References available from satisfied customers nationwide.

From the elevator to the production line  
to the lab, DICKEY-john instruments  
put the facts at your fingertips.

No one has more experience with grain analysis than DICKEY-john. And no one builds a larger or more popular line of grain analysis instruments.

Like the DICKEY-john Motomco® 919® — so rugged and reliable that it's FGIS approved.

The new DICKEY-john Motomco® 919 Automatic gives you the same inspector-accurate performance in an easy to use design.

The DICKEY-john GAC II® is a fully automatic instrument that determines moisture content, grain temperature, and

approximate weight per bushel in less than 20 seconds.

The DICKEY-john GAC III® is a near infrared analyzer that provides a quick accurate measurement of the percentage of moisture, protein and other constituents in a variety of grains.

The DICKEY-john Instalab® is a highly versatile NIR instrument that can analyze up to 52 product constituents.

And of course, the entire DICKEY-john family is backed by a nationwide service network. Call or write today for information.

# The Foremost Name in Fumigants.

# PhosTek®

Meet "The Killer":

PhosTek aluminum phosphide fumigant for all stages of grain

insects. This highly potent formulation comes in tablet or pellet form. The natural moisture in the air starts it working to wipe out all grain insects and rodents.

Use PhosTek to fumigate storage bins, elevators, warehouses and railroad cars. Works on raw

commodities, animal feed, processed foods, and nonfoods like tobacco and wool. PhosTek leaves competition gasping for air. It's the kind of product you get from Douglas. We're the leader in stored grain fumigation.

RESTRICTED USE PESTICIDE DUE TO ACUTE INHALATION TOXICITY OF HIGHLY TOXIC PHOSPHINE GAS

For retail sale to and use only by Certified Applicators for those uses covered by the applicators certification or persons trained in accordance with the attached product manual working under the direct supervision and in the physical presence of the Certified Applicator. Physical presence means that the Certified Applicator must be available on site or at the premises. Read and follow the label and Douglas Chemical Co. product manual which contains complete instructions for the safe use of this pesticide.

# CHECK US FIRST!

## Polyethylene Agricultural Buckets

30 Sizes! 3x2 thru 18x8. For general grain handling applications.

## Drag Flights

Tough, U.H.M.W. for any application. Both Food and Industrial Grades. Round bottom, En-masse, and specials.

## Urethane and Nylon Buckets

30 Sizes. 3x2 thru 18x8. For large volume through put, tough and hot applications.

## Hangar Bearings

Wood, U.H.M.W., Wearite, Plastech 1-1/2" shaft thru 3-7/16". All styles. Temperature range to 300°.

## Elevator Bolts and Nuts

1/4", 5/16", and 3/8" carbon steel and stainless steel. All necessary accessory hardware.

## U.H.M.W. and Urethane Sheet

For chute and trough lining. 1/8" thru 4". FDA white and Ind. grade green.

## Industrial Non-Metallic Buckets

15 sizes, heavy wall reinforced centrifugal and continuous discharge.

## "Sabre-Toothed" Bolts

1/4", 5/16", and 3/8": teeth give the holding power you need. Stainless steel and carbon steel.

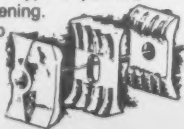

## Hy-Pro Plastic Buckets

Closer spacing increases capacities 30 sizes.

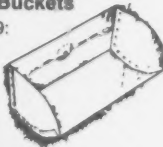

## Maxi-Splice Belt Splice

The most dependable type of positive mechanical belt fastening. "Better than it has to be" for belts thru 1200# P.I.W. Tensile Strength.

## Steel Elevator Buckets

72 sizes thru 24x9: diggers and stainless: all have venting as standard.

## PRODUCT PROFILE

The following is information about products/services offered by advertisers in the Grain Guide.

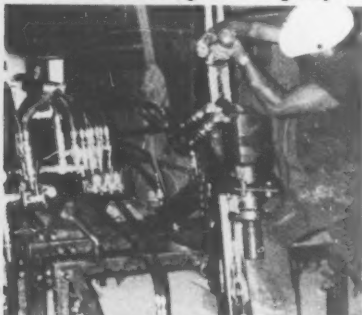

### Grain inspection kit

Douglas Chemical Co., Liberty, Mo., a supplier of fumigants, sprays and protectants since 1916 now offers a grain inspection kit designed for grower use. The Douglas grain inspection kit contains two insect traps with liquid crystal thermometer and one magnifying glass, one bullet probe, one T-handle and two 2-foot extensions, two insect identification containers and instruction booklet.

### Silo cleanout service

Mole Master Services Corp., Marietta, Ohio, specializes in the cleanout and unclogging of all types of grain storage silos and bins. Mole Master utilizes pneumatically and hydraulically actuated equipment to remove unwanted material buildup and clogs. This equipment eliminates the need for putting workers inside the storage vessel. All equipment is controlled from outside the silo. The Mole Master process is dry and non-contaminating which means that the freed material can be reclaimed. The value of the freed material often goes a long way to-

ward financing the cost of the cleanout/unclogging project. Mole Master can service all types of flow problems in grain storage vessels including removing grain and animal feed products that are bridged or solidified inside the silo or bin. Silos and bins are returned to 100% of planned storage capacity to facilitate faster, more efficient material flow. Mole Master contracts for and handles all aspects of the project to minimize the involvement of plant personnel and resources.

### Grain storage silos

York Manufacturing Co., York, Neb., provides complete grain drying, storage and handling systems in 13 diameters. Commercial storage silos with internal Z-bar wall stiffeners are offered in capacities up to 150,000 tonnes. Hopper tanks with gravity unloading capabilities and capacities to 130,000 tonnes and elevators, with single and double trunk designs for any application are included in the York product line.

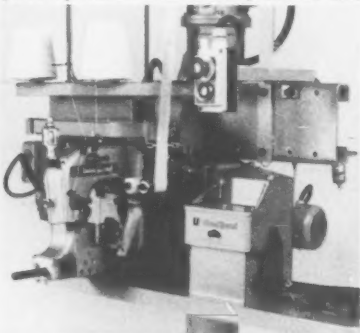

York silos also feature a new deep rib, 35° pitched roof for greater strength. The roof safety ring is standard on all silos and provides complete ring step around the crown for extra safety.

### Lining materials

Diamondback urethane liner materials from Bailey-Parks Urethane, Memphis, Tenn., resists both sliding and impact abrasion. Diamondback is available in a variety of sizes and thicknesses, with expanded metal, solid metal, cotton fabric or plain backing. Diamondback is also available with ceramic chips, in thicknesses from 1/4 to 1/2-inch in 4-by-10-foot sheets.

### Tape over sewn bag closure

Union Special Corp., Huntley, Ill., has introduced the Model 80800TL industrial sewing head, which produces a tape over sewn closure on multi-wall paper and non-woven polypropylene bags. A single pass operation that closes, seams and

places a self-adhesive crepe tape over the sewn seam. This closing process, accomplished simultaneously, creates a sift and infestation proof closure, along with a moisture barrier. The unit is compact, requiring only the same floor space as a standard bag closing system.

### Commercial grain dryers

The concept of the MGR Series commercial grain dryer was developed to enable the commercial operator to make better management decisions. The name MGR reflects the consistent efforts of the MGR Commercial Grain Dryers division of Farm Fans, Inc., Indianapolis, Ind., to provide the ultimate in drying equipment. The MGR series offers a variety of choices, enabling him to adjust to a variety of crop conditions. Full vacuum cool, full pressure cool, full heat, partial cool, reclaiming or non-reclaiming are just a few of the features built into each MGR dryer, providing a manageable operation for every crop under every condition.

### New aeration management system

Caldwell Manufacturing Co., Kearney, Neb., has introduced a new automated management system for grain storage aeration operations. The Caldwell analytical aeration computer is a solid-state electronic system that constantly monitors grain temperature as well as ambient air temperature and relative humidity. The system automatically operates aeration fans only when necessary and only

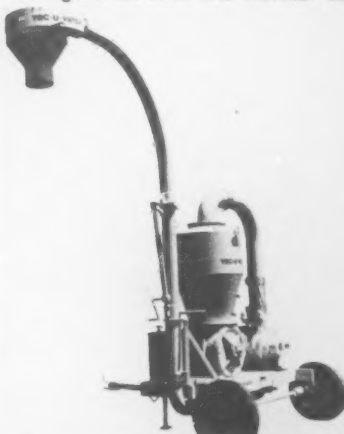

when outside air and relative humidity are ideal. The system can be installed easily in any size storage operation and all components have been designed for reliable operation in typical on-farm environments. The sophisticated system is simple to operate and completely programmable to operator specifications. The computer is backed by Caldwell service and a one-year warranty.

### Pneumatic grain conveyors

The Model 1061 pneumatic grain conveyor from Dunbar Kapple, St. Charles, Ill., offers the ultimate versatility of any grain conveying machine and only requires 90 hp to move up to 4,200 bushels per hour.

Designed for farm and elevator use,

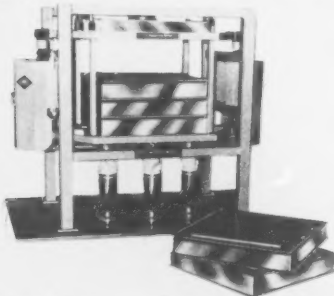

the unit features advanced technology filtration, energy efficient industrial positive displacement pump, 1,000 rpm P.T.O. drive, heavy-duty 3.0 airlock with adjustable steel tips, 6-inch lightweight aluminum piping with quick couplers, easy service access and rotating truck loading kit.

## PRODUCT PROFILE

### Stainless steel sifter

Great Western Manufacturing Co., Leavenworth, Kas., has introduced an all stainless steel Tru-Balance sifter. This sifter is designed for applications where sanitation requirements will allow only stainless steel construction and is ideal for abrasive materials and locations with high humidity.

The sifter which features a boxless design, with nest together sieves and lift-out

screen frames, can be dismantled in minutes for easy inspection or screen change. Two sieve sizes and from five to 12 sieve stacks are available to match most any capacity requirement or mesh size specification. The sieves are fabricated from 304 stainless steel and sealed with neoprene food grade gaskets. The smooth, all welded, construction can be completely disassembled for cleaning by brush, water wash or live steam.

### Grain storage construction

Borton, Inc., Hutchinson, Kas., recently completed a 554,707-bu facility for Dillwyn Grain & Storage, Dillwyn, Kas. The facility consists of four silos with a truck receiving pit, shed, driveway, reclaim

tunnel and transfer bridge. Each tank has 6/12 hopperfill for partial self cleaning as well as reduced construction cost, with 9/12 hopperfill in one star bin. The mechanical systems include temperature, aeration, truck loadout spouts and receiving, reclaim and transfer equipment operating at 10,000 bph.

### Filled epoxies

Rhino Hyde Products from Tandem Products, Inc., Blooming Prairie, Minn., have introduced a line of filled epoxies under the Rhinox label. The line includes six durable and versatile compounds for repair, maintenance, production, tooling and building up work equipment. Rhinox filled epoxies are two-component systems that harden when a curing agent is added to the resin, and are available in both putty and brushable forms. When cured, Rhinox epoxies can be drilled, tapped, machined or painted. A selection of performance and application characteristics allow you to select the epoxy best suited to your needs.

### Grain cleaner

Rotex, Inc., Cincinnati, Ohio, has announced the addition of a new model to its line of grain cleaners. Model 582 has a screen surface of 72-by-144 inches, or 20% larger than previous comparable models, providing the ability to clean corn to California specifications at rates up to 7,500 bph. The machine is also intended for applications involving close precleaning ahead of processing.

Rotex grain cleaners are manufactured in 16 standard models, including units for scalping as well as fines removal, or a combination of both. Capacities range up to 40,000 bph for scalping and 20,000 bph for fines removal. For capacities up to 50,000 bph the company offers its Megatex cleaners.

### Cyclone mill for NIR testing

The Cyclotec mill from Tecator, Inc., Herndon, Va., is intended for rapid and uniform grinding of a wide variety of feeds, grains and leaves, as well as chemicals pharmaceuticals, and similar products. It is widely used by industry

and U.S.D.A. for preparing grain and forage samples for NIR analysis. Dust-free operation, no cleanout between samples, and no thermal degradation are other benefits of the Cyclotec.

### Silo blockage removal system

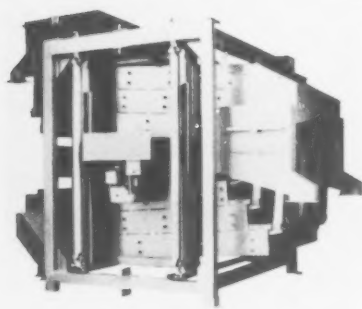

Bulk solid blockages in silos can be cleared quickly, safely and economically with the system developed by Anteby Enterprises, Toronto, Ontario. Proven effective with most materials, from soybean meal to cement, the system does not damage the silo or contents. Faster than former methods, it is backed by a "no-result, no-charge" policy.

### Mobile grain vacuum

The Model 660 diesel mobile bulk grain vac from Handlair, Blomkest, Minn., will convey from 80 to 120 tonnes per hour through a 15.24 cm line. The unit is powered by a 152-hp diesel engine, and has capabilities for both vacuum and pressure combinations. It comes standard with a silencer for quiet operation, a direct-driven commercial blower, a vented self-cleaning airlock with adjustable tips, a 360 degree swivel cyclone and

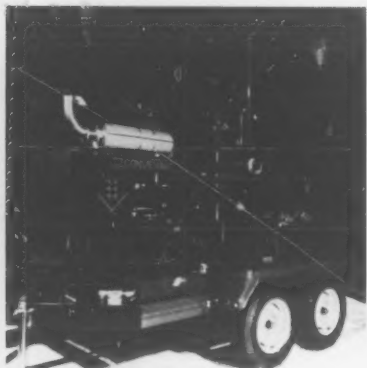

truck load-out and fuel tank. The machine is highway towable, with radial tires, brakes and lights. Whether used individually for rail car, warehouse, bunker or container filling or in multiples for ship and barge unloading, the 660D is made to be gentle enough to handle malt, yet tough enough for any other grain. Filtration options are available for soybeans, rice and sunflowers.

## Flat rotary grain cleaner

The Screenerator from Carter Day Co., Minneapolis, Minn., is a high capacity, flat rotary grain cleaner that is designed with a unique center drive system. This system can be customized to a wide range of cleaning capacities and capabilities that make it ideally sized for grain elevators or terminal load-outs.

The new generation of Carter Screenerator is now available in two configurations, either parallel or counterflow with more than 50 possible upper and lower deck screen arrangements. Capacities range from 1,000 to 20,000 bph.

## Diesel grain vacuum

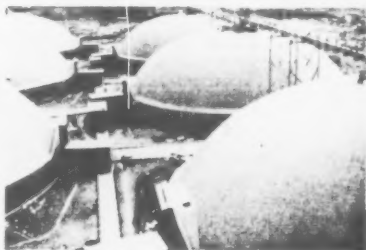

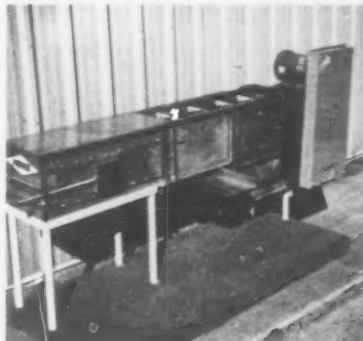

Vana Industries Ltd., Winnipeg, Manitoba, has introduced a new diesel-powered grain vacuum to the company's line extensive Conveyor line.

The new Model 4005SD comes equipped standard with a 151-hp Isuzu diesel engine, 6-inch intake and discharge lines, tandem spring axles, electric brakes, 2-by-6-inch tubular frame, patented rotatable truck loading kit, reversible hydraulic airlock and patented protective double filtration system.

This model provides a high capacity of approximately 3,700 bph in corn, all in a neat, compact and highly mobile unit.

## Drag conveyor

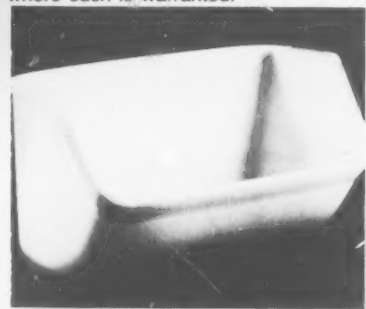

Henke Machine, Inc., Columbus, Neb., announces the availability of its all new Kwik-Flo II drag conveyor. Made of heavy-gauge galvanized construction, the Kwik-Flo II drag conveyor is available in five sizes with capacities through 25,000 bph. Standard features include all bolted construction, pintle chain with steel attachments, carry back cups, UHMW flighting, replaceable bottom, easily removed head shaft and tail shaft assemblies including bearings, shaft and chain sprocket. Optional features include heavy abrasion resistant steel bottom and self-contained drives.

## Grain facility design, construction

The broad experience of Howe International Ltd., Ottawa, Ontario, encompasses work on all types of grain terminals, ranging from small country storage elevators to multi-million tonne country-wide storage complexes, including some of the largest export and import terminals in the world.

A thorough knowledge of the grain trade enables the staff of Howe International to design grain terminals to suit local conditions and the types of grain being handled and to make appropriate provisions for environmental controls systems, aeration, preservation, temperature detection, drying and cleaning, where such is warranted.

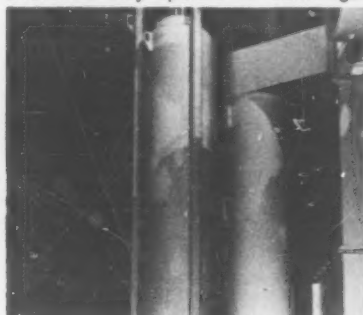

## Elevator buckets

Maxi-Lift, Inc., Dallas, Texas, manufactures and supplies all types and sizes of elevator buckets to fit your particular material handling requirements. The company offers more than 30 sizes of non-metallic buckets in four plastic materials. Metal buckets are also made to order in any type, size and material as specified by the customer.

## Silencers for centrifugal fans

Recent developments from Kice Industries, Wichita, Kas., include silencers for centrifugal blowers. The major difference between silencing centrifugal blowers and positive displacement blowers is the differential they operate in. Centrifugal

blowers operate up to 40-inches wg and positive blowers up to 400 inches wg.

Most chamber or expansion silencers have 6 to 10-inch wg pressure drop across them so you can see the problem of adding this type of silencer to a centrifugal blower. With the Kice absorption-type silencer, there is less than 1-inch wg additional pressure drop because of the straight-through design. Although the silencers are large for centrifugal fans, they are small when compared to the expansion or chamber silencers.

## Dust control filter media

Beane Bag filters, manufactured by Industrial Filter Fabrics Ltd., Hamilton, Ontario, offer a low-cost alternative to increase the efficiency and safety of undersized, overworked and inefficient dust collector systems. The media are designed to provide a lower resistance to air flow than conventional woven and felted fabrics. This makes it possible to increase air flow through the system, increase dust pick-up vacuum and significantly reduce pressure drop differentials.

High pressure drop conditions across the baghouse system considerably increase the energy required to operate the system. It follows that, if the high pressure drop condition can be corrected and reduced, the energy savings that result could be substantial.

## SUPPLIER FAX NUMBERS

The following fax numbers were submitted with company listings. See Manufacturers/Distributors/Service Companies section for complete address.
